KTI. Program Studi D3 Perekam dan Informasi Kesehatan. 2020
(xv + 66)

Desain formulir adalah kegiatan merancang formulir berdasarkan kebutuhan transaksi pelayanan atau pembuatan pelayanan laporan organisasi. Isi dari formulir rekam medis sangat kompleks karena berisikan data demografi dan data klinis pasien dari pasien masuk hingga pasien keluar atau pulang dari sarana pelayanan kesehatan. Puskesmas Simpur hanya menggunakan formulir rekam medis rawat jalan. Tujuan penelitian ini adalah mendesain formulir rekam medis rawat jalan di Puskesmas Simpur. Metode penelitian yang digunakan adalah deskriptif. Subjek penelitian ini yaitu formulir rekam medis rawat jalan dan responden penelitian adalah petugas rekam medis, dokter dan perawat yang berjumlah 3 orang. Berdasarkan hasil penelitian, formulir rekam medis rawat jalan di Puskesmas Simpur sudah memiliki formulir rekam medis rawat jalan akan tetapi masih kurang lengkap pada bagian identitas pasien.

OUTPATIENT MEDICAL RECORD FORM DESIGN AT PUSKESMAS SIMPUR IN 2020

*Scientific Paper. Medical Record and Health Information Program. 2020
(xv + 66)*

Form design is the activity of designing forms based on the needs of service transactions or making service organizational reports. The contents of the medical record form are very complex because they contain demographic data and clinical data from patients entering to patients leaving or leaving health care facilities. Simpura Puskesmas only uses outpatient medical record forms. The purpose of this study was to design an outpatient medical record form at the Simpura Health Center. The research method used is descriptive. The subjects of this study were outpatient medical record forms and the research respondents were 3 medical record officers, doctors and nurses. Based on the results of the research, The outpatient medical record form at the Simpura Health Center already has an outpatient medical record form but it is still incomplete in the patient identity section.
