*REVIEW OF MEDICAL RECORD MAINTENANCE DOCUMENTS IN THE
FILING PELITA INSANI HOSPITAL MARTAPURA 2020*

Scientific Paper. Medical Record And Health Information Study Program. 2017

(xvi+67)

Medical record documentation as a source of sensitive information requires storage, security, and maintenance of medical records that include a storage area, the maintenance, and maintenance of documents from harm and damage. The Pelita Insani Hospital Martapura in the maintenance of his medical records in the infirmary hasn't been working properly. Therefore the purpose of this study is to know the maintenance of medical record documents in the genealogical room involves storage systems, filing systems, facilities, fixed procedures, and basic assignment. This research uses descriptive method research through interviews. Research on the storage system used at Pelita Insani Hospital Martapura centralized system of medical records and hospitalization. The filing system of Pelita Insani Hospital Martapura that used the final number system, which would make it easy to calculate the need for storing medical records. The tools and infrastructure of the Pelita Insani Hospital Martapura are inadequate because the room of medical record and filing room are only one room . A fixed procedure at the Pelita Insani hospital Martapura has been followed through. Adaptive personnel at the Pelita Insani hospital Martapura is being run by duties required by the hospital.
