KESIAPAN IMPLEMENTASI REKAM MEDIS ELEKTRONIK DI RUMAH SAKIT DAERAH IDAMAN BANJARBARU

KTI, Program Studi D3 Perkam dan Informasi Kesehatan. 2020
(xvi + 78)

Rumah Sakit Daerah Idaman Banjarbaru memiliki aplikasi rekam medis elektronik, namun masih dalam tahap persiapan untuk menuju ke penggunaan rekam medis elektronik. Hal ini akhirnya menyebabkan berubahnya cara kerja pelayanan yang awalnya secara manual, berubah menjadi elektronik. Penelitian ini bertujuan untuk mengetahui kesiapan dalam implementasi rekam medis elektronik di RSD Idaman Banjarbaru. Metode yang digunakan adalah metode penelitian deskriptif dengan pendekatan kualitatif. Instrumen penelitian ini adalah pedoman observasi dan pedoman wawancara. Penelitian ini dilakukan kepada 4 informan yaitu kepala instalasi rekam medis, kepala instalasi TI, koordinator pelayanan rekam medis rawat jalan, dan teknisi TI. Hasil penelitian ini yaitu, pengetahuan petugas mengenai rekam medis elektronik di RSD Idaman Banjarbaru, petugas telah tahu arti dari rekam medis elektronik dan bagaimana manfaatnya bagi rumah sakit. Keterlibatan sumber daya manusia dalam kesiapan implementasi rekam medis elektronik, seluruh sumber daya manusia ikut serta dalam memberikan masukan-masukan terkait proses penyusunan rekam medis elektronik seperti memberikan masukan atau saran dalam pembuatan formulir rekam medis elektronik melalui rapat komite. Rekam medis elektronik di RSD Idaman Banjarbaru tidak ada sehingga tidak ada *training* rekam medis elektronik karena rekam medis elektronik masih dalam proses penyusunan. Di RSD Idaman belum ada kesiapan implementasi rekam medis elektronik.

READINESS OF THE IMPLEMENTATION OF ELECTRONIC MEDICAL RECORD IN THE IDAMAN BANJARBARU HOSPITAL

*Scientific Paper, Medical Record and Health Information Program Studies. 2020
(xvi + 78)*

Idaman Banjarbaru Regional Hospital has an electronic medical record application, but is still in the preparation stage to go to the use of electronic medical records. This eventually led to a change in the way the service worked which was initially manually, turned into electronics. This research aims to find out readiness in the implementation of electronic medical records at Idaman Banjarbaru Hospital. The method used is a descriptive research method with a qualitative approach. These research instruments are observation guidelines and interview guidelines. This research was conducted to 4 informants, namely the head of the medical records installation, the head of it installation, the coordinator of outpatient medical record services, and it technicians. The results of this study are, the knowledge of officers about electronic medical records at Idaman Banjarbaru Hospital, officers have known the meaning of electronic medical records and how they benefit hospitals. The involvement of human resources in the readiness of the implementation of electronic medical records, all human resources participate in providing input related to the electronic medical records preparation process such as providing input or suggestions in making medical record forms through committee meetings. Electronic medical records at Idaman Hospital banjarbaru do not exist so there is no electronic medical record training because electronic medical record is still in the process of being compiled. Readiness of electronic medical record implementation in Idaman Banjarbaru regional hospital, officers know the meaning and benefits of electronic medical records, human resources are involved in the preparation of the implementation of electronic medical records, there is no electronic medical record training at Idaman Banjarbaru Hospital.
