REDESAIN FORMULIR REKAM MEDIS DI LABORATORIUM STIKES HUSADA BORNEO BANJARBARU

Karya Tulis Ilmiah. Program Studi D3 Perekam dan Informasi Kesehatan. 2022
(xvi + 59 + Lampiran)

Formulir *informed consent* merupakan salah satu formulir yang diabadikan dan merupakan bagian dari berkas (resume medis) pasien. Terdapat pada Laboratorium STIKes Husada Borneo Banjarbaru, formulir *informed consent* rawat inap tidak tercantum *heading* dan *instruction* tidak jelas. Tujuan penelitian adalah redesain formulir rekam medis di Laboratorium STIKes Husada Borneo Banjarbaru. Metode penelitian ini menggunakan metode penelitian deskriptif. Subjek penelitian ini adalah Koordinator Laboratorium, dan Kepala Prodi Rekam Medis. Berdasarkan hasil penelitian, desain formulir *informed consent* rawat inap di Laboratorium STIKes Husada Borneo Banjarbaru ditinjau dari aspek anatomi, perlu adanya beberapa perbaikan karena tidak sesuai seperti *heading* dan *instruction*. Desain formulir *informed consent* rawat inap ditinjau dari aspek fisik menggunakan kertas HVS 70 gram berukuran A4 dengan posisi persegi panjang, warna formulir putih dan warna tinta hitam. Desain *informed consent* rawat inap ditinjau dari aspek isi telah menggunakan item, singkatan dan simbol yang standar tetapi belum terdapat istilah. Tetapi formulir *informed consent* rawat inap menambahkan item seperti petunjuk diisi oleh pihak rumah sakit dan pihak pasien/keluarga, jenis ruangan/kelas, diagnosa dan jenis tindakan. Desain ulang formulir *informed consent* rawat inap pada aspek anatomi dan aspek isi terdapat beberapa bagian yang tidak sesuai. Penambahan item pada aspek isi seperti diisi oleh pihak rumah sakit dan pihak pasien/keluarga, jenis ruangan/kelas, diagnosa dan jenis tindakan, penambahan pada aspek anatomi ada *heading* seperti alamat, kode pos, nomor telepon, dan logo dan pada *instruction* seperti petunjuk formulir diisi oleh pasien/keluarga, dan pihak rumah sakit.

Kata Kunci : Formulir, *Informed Consent*, Redesain, Rekam Medis

REDESIGN OF MEDICAL RECORD FORM AT STIKES HUSADA BORNEO BANJARBARU LABORATORY

*Writes Scientifically. D3 Study Program Recorder and Health Information. 2022
(xvi + 59 + Attachment)*

The informed consent form is one of the forms that is immortalized and is part of the patient's file (medical resume). Located at the STIKes Husada Borneo Banjarbaru Laboratory, the inpatient informed consent form does not include headings and instructions are not clear. The purpose of the study was to redesign the medical record form at the STIKes Husada Borneo Banjarbaru Laboratory. This research method uses descriptive research methods. The subjects of this study were the Laboratory Coordinator, and the Head of the Medical Record Study Program. Based on the results of the study, the design of the inpatient informed consent form at the STIKes Husada Borneo Banjarbaru Laboratory in terms of the anatomical aspect, needs some improvements because it is not appropriate, such as headings and instructions. The design of the inpatient informed consent form from the physical aspect used HVS 70 gram A4 paper with a rectangular position, the color of the form is white and the color of the ink is black. The design of inpatient informed consent in terms of content has used standard items, abbreviations and symbols but there are no terms. However, the inpatient informed consent form added items such as instructions filled in by the hospital and the patient/family, type of room/class, diagnosis and type of action. The redesign of the inpatient informed consent form on the anatomical aspect and the content aspect contained several parts that were not appropriate. Addition of items in the content aspect such as being filled in by the hospital and the patient/family, type of room/class, diagnosis and type of action, addition to the anatomical aspect, including headings such as address, postal code, telephone number, and logo and on instructions such as form instructions. filled by the patient/family, and the hospital.
