### **GAMBARAN PENGOLAHAN BERKAS REKAM MEDIS PASIEN COVID-19 DI RSD IDAMAN BANJARBARU**

Karya Tulis Ilmiah. Program Studi D3 Perekam dan Informasi Kesehatan. 2022

(xiv + 34 + lampiran)

*Coronavirus Disease of 2019 (COVID-19)* adalah penyakit menular yang disebabkan oleh jenis *Coronavirus* yang baru ditemukan. Virus baru dan penyakit yang disebabkan ini tidak dikenal sebelum mulainya wabah di Wuhan, Tiongkok, bulan Desember 2019. *COVID-19* menjadi permasalahan serius di Provinsi Kalimantan Selatan, kasus positif *COVID-19* pertama kali di Provinsi Kalimantan Selatan terverifikasi pada 22 Maret 2020. Fenomena saat ini tentunya tidak luput dari peran Perekam Medis dalam pengolahan sumber data klinis, yang tertuang dalam berkas rekam medis pasien *COVID-19*. Berdasarkan hasil wawancara dengan petugas rekam medis RSD Idaman Banjarbaru ketika studi pendahuluan yang dilaksanakan pada tanggal 18 November 2021 di RSD Idaman Banjarbaru, didapatkan fakta bahwa adanya perbedaan proses pengolahan data antara berkas rekam medis pasien kasus biasa dengan berkas rekam medis pasien *COVID-19*. Tujuan penelitian ini adalah untuk mengetahui gambaran pengolahan berkas rekam medis pasien *COVID-19* di RSD Idaman Banjarbaru. Penelitian ini menggunakan metode deskriptif, yaitu penelitian dilakukan secara utuh kepada subjek penelitian, kemudian hasil penelitian tersebut diuraikan dalam bentuk kata-kata yang tertulis secara data empiris yang telah diperoleh. Pengambilan data rekam medis pasien *COVID-19* tidak diambil langsung dari berkas rekam medis, tetapi dalam pelaksanaannya telah sesuai dengan kebijakan Standar Pelayanan Berfokus Pasien pada SNARS Edisi 1, BAB 7 Manajemen Komunikasi dan Edukasi, selain itu kebijakan pelaporan berkas rekam medis pasien *COVID-19* di RSD Idaman Banjarbaru sudah sesuai dengan kebijakan SK Dirjen Yanmed tentang Sistem Pelaporan Rumah Sakit, dan prosedur pengisian berkas rekam medis pasien *COVID-19* di RSD Idaman Banjarbaru tidak menggunakan Standar Operasional Prosedur (SPO) khusus.

Kata kunci: Pengolahan, Rekam Medis, *COVID-19*

### **DESCRIPTION OF MEDICAL RECORD PROCESSING OF COVID-19 PATIENTS AT IDAMAN RSD BANJARBARU**

*Scientific Writing. D3 Recorder and Health Information Study Program. 2022*

*(xiv + 34 + attachment)*

*Coronavirus Disease 2019 (COVID-19) is an infectious disease caused by a newly discovered type of Coronavirus. This new virus and the disease it causes were unknown before the outbreak began in Wuhan, China, in December 2019. COVID-19 has become a serious problem in South Kalimantan Province, the first positive case of COVID-19 in South Kalimantan Province was verified on March 22, 2020. Phenomenon Currently, of course, medical records cannot escape the role of Medical Recorders in processing clinical data sources, which are contained in the COVID-19 file. Based on interviews with medical records officers of the Idaman Banjarbaru Hospital during a preliminary study conducted on November 18, 2021 at the Idaman Banjarbaru Hospital, it was found that there were differences in the data processing process between the medical record files of ordinary case patients and the medical records of COVID-19 patients. The purpose of this study was to describe the processing of medical files for COVID-19 patients at Idaman Hospital Banjarbaru. This study uses a descriptive method, namely the research is carried out in its entirety to the research subject, then the results of the research are described in the form of written words that have been empirically obtained. The data collection of COVID-19 patient medical records was not taken directly from the patient's medical record, but in its implementation it was in accordance with the Patient-Focused Service Standard policy on SNARS Edition 1, Chapter 7 Communication and Education Management, in addition to reporting the medical record file of COVID-19 patients in Idaman Hospital Banjarbaru is in accordance with the policy of the Director General of Health and Medical Services regarding the Hospital Reporting System, and the procedure for filling out medical record files for COVID-19 patients at Idaman Hospital Banjarbaru does not use special Standard Operating Procedures (SPO).*
