### **REDESAIN FORMULIR RESUME MEDIS RAWAT JALAN DI RUMAH SAKIT DAERAH IDAMAN BANJARBARU**

KTI. Program Studi Pererekam dan Informasi Kesehatan  
(xv + 59 + 16 lampiran)

Formulir rekam medis adalah lembaran kertas yang sudah terformat, tercetak yang digunakan sebagai instrumen untuk mencatat, merekam semua tentang informasi pasien. Formulir resume medis rawat jalan di Rumah Sakit Daerah Idaman Banjarbaru belum terdapat *instruction* dan *close*. Tujuan penelitian adalah melakukan redesain formulir resume medis rawat jalan. Metode penelitian ini menggunakan penelitian deskriptif. Subyek penelitian ini adalah 1 orang dokter di poliklinik bedah, 1 orang sekretaris panitia rekam medis, dan 1 orang kepala instalasi rekam medis. Berdasarkan hasil penelitian, formulir resume medis rawat jalan secara aspek anatomi belum terdapat bagian petunjuk pengisian formulir (*instruction*) dan penutup formulir (*close*). Formulir resume medis rawat jalan telah terdapat kepala formulir (*heading*), pendahuluan (*introduction*) dan isi formulir (*body*). Formulir resume medis rawat jalan secara aspek fisik telah menggunakan kertas HVS dengan ukuran A4 dan berwarna putih tetapi belum memudahkan dalam pengisiannya karena ruang pengisian data yang kurang luas pada informasi diagnosis dan terapi. Aspek isi formulir resume medis rawat jalan telah menggunakan istilah, singkatan yang standar dan tidak menggunakan symbol tetapi belum terdapat tanda tangan dokter. Pengguna formulir tidak memiliki peran dalam mendesain formulir resume medis rawat jalan dan formulir resume medis rawat jalan pernah dilakukan evaluasi oleh panitia rekam medis dan evaluasi formulir resume medis rawat jalan terhambat dikarenakan pandemi Covid-19. Formulir resume medis rawat jalan yang dilakukan redesain telah memenuhi aspek anatomi, aspek fisik, dan aspek isi.

### **REDESIGN OF OUTPATIENT MEDICAL RESUME FORM AT IDAMAN HOSPITAL BANJARBARU**

*Scientific Writing. Medical Record and Health Information  
(xv + 59 + 16 attachment)*

*Medical record form is a sheet of paper that has been formatted, printed which is used as an instrument to record, record all about patient information. The outpatient medical resume form at Idaman Hospital Banjarbaru does not have instructions and close. The purpose of the research was to redesign the outpatient medical resume form. This research method uses descriptive research. The subjects of this study were 1 doctor at the surgical clinic, 1 secretary of the medical records committee, and 1 head of the medical record department. Based on the results of the research, the anatomical aspect of the outpatient medical resume form does not contain instructions for filling out the form (instruction) and closing the form (close). The outpatient medical resume form includes a heading, introduction and body. The outpatient medical resume form physically uses HVS paper with A4 size and white color, but it is not easy to fill in because the space for filling in the data is not wide enough for diagnosis and therapy information. Aspects of the contents of the outpatient medical resume form have used standard terms, abbreviations and do not use symbols but there is no doctor's signature yet. The form user has no role in designing the outpatient medical resume form and the outpatient medical resume form has been evaluated by the medical records committee and the evaluation of the outpatient medical resume form has been hampered due to the Covid-19 pandemic. The redesigned outpatient medical resume form has fulfilled the anatomical, physical, and content aspects.*
