GAMBARAN DESAIN FORMULIR REKAM MEDIS RAWAT INAP DI RUMAH SAKIT BAYANGKARA TK.III BANJARMASIN

KTI. Program Studi Perekam dan Informasi Kesehatan
(xiv + 57)

Formulir ringkasan pulang rawat inap (*resume medis*) yaitu ringkasan riwayat pemeriksaan dan pengobatan pasien selama dirawat di rumah sakit. Formulir hanya memenuhi persyaratan akreditasi tahun 2012, belum terdapat beberapa komponen berdasarkan prinsip desain formulir dan berdasarkan fisik serta tampilan formulir. Hal ini berdampak informasi yang terdapat pada formulir menjadi kurang terpenuhi. Tujuan penelitian adalah menggambarkan desain formulir rekam medis rawat inap di Rumah Sakit Bhayangkara TK. III Banjarmasin. Metode penelitian ini menggunakan deskriptif yaitu menggambarkan dan menjelaskan desain formulir meliputi fisik dan *layout* formulir, prinsip desain formulir dan Standar Nasional Akreditasi Rumah Sakit. Unit Analisis dan objek dari penelitian ini adalah formulir rekam medis rawat inap. Berdasarkan hasil penelitian, formulir mudah diisi, logis, mudah dilengkapi, terdapat heading mencakup judul dan kop formulir serta terdapat nomor dan tanggal revisi formulir dan huruf yang digunakan terstandar. Formulir memiliki kepala formulir, isi formulir dan penutup formulir. Formulir berisikan informasi riwayat kesehatan, pemeriksaan fisik, pemeriksaan diagnostik, prosedur terapi, tindakan yang telah dilakukan, obat yang diberikan termasuk obat setelah pasien keluar rumah sakit, kondisi kesehatan pasien saat keluar dari rumah sakit. Sebaiknya formulir ringkasan pulang rawat inap (*resume medis*) mencantumkan pendahuluan formulir, petunjuk pengisian, informasi indikasi pasien dirawat, diagnosis dan komorbiditas lain serta informasi instruksi tindak lanjut dan ditandatangani oleh pasien.

DESCRIPTION OF THE DESIGN QUALITY INPATIENT MEDICAL RECORD FORMS IN BAYANGKARA TK.III BANJARMASIN HOSPITAL

*KTI. DIII Medical Record and Health Information Study Program 2021
(xiv + 57)*

Inpatient discharge summary form (medical resume) is a summary of the history of the patient's examination and treatment during hospitalization. The form only fulfills the 2012 accreditation requirements, there are not several components based on the principles of form design and based on the physical and appearance of the form. This has an impact on the information contained in the form to be less fulfilled. The purpose of the study was to describe the design of an inpatient medical record form at Bhayangkara TK Hospital. III Banjarmasin. The method of this research is descriptive, namely describing and explaining the design of the form including the physical and the layout of the form, the principles of form design and the National Standard for Hospital Accreditation. The unit of analysis and the object of this research is the inpatient medical record form. Based on the research results, the form is easy to fill out, logical, easy to complete, there are headings including the title and head of the form as well as the number and date of the form revision and the letters used are standardized. The form has a form header, form fill and form cover. The form contains information on medical history, physical examination, diagnostic examination, therapeutic procedures, actions that have been taken, drugs given including drugs after the patient is discharged from the hospital, the patient's health condition when he is discharged from the hospital. It is recommended that the inpatient discharge summary form (medical resume) includes an introduction to the form, instructions for filling out, information indicating the patient is being treated, diagnoses and other comorbidities as well as follow-up instructions and signed by the patient.
