### **FAKTOR-FAKTOR YANG MEMPENGARUHI KERUSAKAN BERKAS REKAM MEDIS DI UPT PUSKESMAS MARTAPURA 2 TAHUN 2021**

KTI. Program Studi D3 Perekam dan Informasi Kesehatan. 2021

(xvi + 97)

Kerusakan berkas rekam medis dan pengambilan atau peminjaman berkas rekam medis tidak hati-hati, rak penyimpanan yang sempit dan juga tidak menggunakan roll o'pack mengakibatkan rekam medis pasien bisa robek dan tidak terbaca dan ditemukan botol minum dan makanan sisa yang tidak di buang diruang filing apabila minuman tumpah ke berkas rekam medis akibatnya berkas rekam medis akan rusak. Tujuan penelitian untuk mengetahui faktor-faktor yang mempengaruhi kerusakan berkas rekam medis di UPT Puskesmas Martapura 2 Tahun 2021. Metode penelitian ini adalah deskriptif pendekatan kualitatif. Hasil penelitian pada sarana yang ada di ruang filing tidak sesuai karena tidak memiliki roll o'pack, memiliki AC, buku ekspedisi, dan tracer, keadaan berkas rekam medis dari aspek fisik yaitu tidak sesuai karena ada berkas yang masih mengalami kerusakan diakibatkan oleh berkas rekam medis yang terlalu banyak, Keadaan berkas rekam medis dari aspek kimiawi yaitu sesuai standar karena tidak ada tinta yang memudar, tidak terdapat tumpahan makanan dan minuman di ruangan filing. Faktor-faktor yang mempengaruhi kerusakan berkas rekam medis di UPT Puskesmas Martapura 2 Tahun 2021 adalah dari faktor sarana dan aspek fisik.

### **FACTORS AFFECTING CAUSE DAMAGE TO DOCUMENTS MEDICAL RECORD PUBLIC HEALTH CENTER MARTAPURA 2 YEAR 2021**

*Scientific Paper. Medical Record And Health Information Study Program. 2021*

(xvi + 97)

*Damage to medical record files and careless retrieval or borrowing of medical record files, narrow storage shelves and also not using a roll o'pack resulted in the patient's medical record being torn and unreadable and drinking bottles and leftover food were found that were not disposed of in the filing room. if the drink is spilled into the medical record file as a result the medical record file will be damaged. The purpose of the study was to determine the factors that affect the damage to medical record files at the at public health center Martapura 2 in 2021. This research method is a descriptive qualitative approach. The results of the research on the facilities in the filing room were not suitable because they did not have a roll o'pack, had air conditioning, expedition books, and tracers, the state of the medical record file from the physical aspect was not appropriate because there were files that were still damaged due to the medical record file. which is too much, The condition of the medical record file from the chemical aspect is appropriate because there is no fading of ink, there are no spills of food and drinks in the filing room. The factors that affect the damage to the medical record file at the at public health center Martapura 2 in 2021 are from the facilities factor and the physical aspect.*
