### **INFLUENCE OF HOSPITAL IMAGE, FACILITIES, SERVICE QUALITY, AND COMMUNICATION ON INPATIENT BPJS PATIENT SATISFACTION AT RATU ZALECHA MARTAPURA HOSPITAL**

*KTI D3 Recording and Health Information Study Program 2024  
(xiv+51)*

*Patient satisfaction is related to the level of satisfaction felt by the patient with the health services received. Patient satisfaction can be seen from four variables, namely hospital image, facilities, service quality and communication. Ratu Zalecha Hospital has also carried out a patient satisfaction index in 2021 and 2022. In 2021, the patient satisfaction index was 80.73% and in 2022 the patient satisfaction index was 80.09%. As seen from this data, there was a decrease in the patient satisfaction index at Ratu Zalecha Hospital, Martapura. Objectives research to determine the influence of hospital image, facilities, service quality and communication on the satisfaction of inpatient BPJS patients at the Ratu Zalecha Martapura Regional General Hospital. The research method uses quantitative with a cross sectional approach. The population in this study was 1,282 inpatients who had used the services of the Ratu Zalecha Martapura Regional General Hospital. The sample was 93 respondents, accidental sampling, the instrument used was a questionnaire. The results of research on inpatient satisfaction were 48 respondents (51.6%) were dissatisfied, the image of the hospital was not good for 51 respondents (54.8%), the hospital facilities for 49 respondents (52.7%) were not good, the quality of service as many as 51 respondents (54.8%) were dissatisfied and communication of 53 respondents (56%) was good. There was an influence on hospital image ( $p$  value = 0.000), facilities ( $p$  value = 0.003), service quality ( $p$  value = 0.031) and communication ( $p$  value = 0.014) on the satisfaction of inpatient BPJS patients at Ratu Zalecha Martapura Regional Hospital.*
