ANALISIS KESIAPAN IMPLEMENTASI REKAM MEDIS ELEKTRONIK RAWAT INAP DI RSU MAWAR BANJARBARU

Karya Tulis Ilmiah. Program Studi Perekam dan Informasi Kesehatan. 2024
(XVii + 101)

Rumah Sakit Umum Mawar Banjarbaru sudah menerapkan rekam medis elektronik pada bagian rawat jalan. Namun diketahui bahwa belum melaksanakan rekam medis elektronik pada bagian rawat inap. Tujuan dari penelitian ini yaitu untuk mengetahui gambaran kesiapan implementasi rekam medis elektronik rawat inap di Rumah Sakit Umum mawar Banjarbaru. Metode penelitian ini adalah penelitian kualitatif. Informan dalam penelitian ini yaitu 1 orang HRD, 1 orang koordinator rekam medis, 1 orang petugas rekam medis dan 1 orang petugas IT. Analisis data pada penelitian ini yaitu dengan cara pengumpulan data, reduksi data, display data, kesimpulan dan verifikasi. Hasil penelitian menunjukkan bahwa kesiapan pada aspek manajemen sudah siap menerapkan rekam medis elektronik karena dianggap menguntungkan dan Pihak manajemen rumah sakit juga telah melakukan perencanaan, mengetahui tahapan dalam menerapkan RME dibagian rawat inap, dengan melibatkan tim rekam medis, IT, perawat dan dokter (DPJP) yang berhubungan dengan penginputan data di rawat inap, aspek operasional belum siap karena belum pernah diadakan pelatihan, seminar, webinar ataupun *workshop* terkait rekam medis elektronik dan aspek teknologi belum siap sepenuhnya menerapkan rekam medis karena hasil wawancara menyatakan sarana dan prasarana sudah dilakukan pembaharuan sesuai dengan standar, namun dijelaskan bahwa dari sisi *user* belum siap menerapkan rekam medis elektronik dan pada hasil observasi masih terdapat beberapa sarana dan prasarana yang belum ada. Hal ini menunjukkan bahwa Rumah Sakit Umum Mawar Banjarbaru belum siap menerapkan rekam medis elektronik.

ANALYSIS OF READINESS FOR THE IMPLEMENTATION OF ELECTRONIC MEDICAL RECORDS FOR INPATIENTS AT GENERAL HOSPITAL MAWAR BANJARBARU

*Scientific papers. Health Recorder and Information Study Program. 2024
(VXii + 101)*

Mawar Banjarbaru General Hospital has implemented electronic medical records in the outpatient department. However, it is known that electronic medical records have not been implemented in the inpatient department. The aim of this research is to determine the readiness to implement inpatient electronic medical records at the Rose Banjarbaru General Hospital. This research method is qualitative research. The informants in this study were 1 HRD person, 1 medical records coordinator, 1 medical records officer and 1 IT officer. Data analysis in this research is by data collection, data reduction, data display, conclusions and verification. The research results show that readiness in the management aspect is ready to implement electronic medical records because they are considered profitable and the hospital management has also carried out planning, knowing the stages in implementing RME in the inpatient department, by involving the medical records team, IT, nurses and doctors (DPJP) related to inputting data in inpatient care, operational aspects are not yet ready because training, seminars, webinars or workshops related to electronic medical records have not been held and technological aspects are not yet fully ready to implement medical records because the results of interviews state that facilities and infrastructure have been updated in accordance with standards However, it was explained that the user side was not yet ready to implement electronic medical records and according to the results of observations there were still several facilities and infrastructure that did not yet exist. This shows that the Mawar Banjarbaru General Hospital is not ready to implement electronic medical records.
